EXPERIENCE

DEXTROPY | Software Engineering Intern
Feb 2021 – Dec 2021 | India
- Managed front-end and back-end development from the scratch to 100% MVP.
- Remained knowledgeable in new standards, technologies, and trends in website development.
- Helped to achieve a consistent look and visual theme across the website by promoting uniform fonts, formatting, images, and layout.
- Technology Used: • Dropwizard • Angular

SONGDEW | Full Stack Developer Intern
June 2020 – Jan 2021 | Gurgaon, India
- Worked on an exciting project that integrates music videos evaluation process with the existing website.
- Built a fully automated web app that reduces the manual work of employees by 80%.
- Effectively multi tasked and worked well with internal and external teams for making project a success.
- Technology Used: • Django • Angular

PROJECTS

GITHUB PROFILE FINDER APP | Angular, Firebase
Jun 2020 – Jul 2020
- Live Demo | GitHub Code
- Build a GitHub Profile viewer app which uses the GitHub free API to fetch user data and repository details based on search keyword.
- Also, for authentication purpose, I have used Firebase, that basically stores data of user like email and encrypted password.

ACTIVE CONTAINERS APP | FastAPI, Docker, and PostgreSQL
Jul 2021 – Aug 2021
- GitHub Code
- In this task, I have created a micro service that obtains information on active containers traveling on the sea.
- Also, created a simple REST API to query the crawled information.
- And created the 'Dockerfile' for packaging your code into a docker image and the corresponding 'docker-compose.yml' file for orchestrating the whole process including setting up the local database and the queue.
